

First Announcement

PODE 2020: Workshop on Population Optimum Design of Experiments
Magdeburg, June 15, 2020

We are very happy to announce that the next Workshop on Population Optimum Design of Experiments, PODE 2020, will take place on Monday, June 15, 2020, in Magdeburg, Germany.

PODE 2020 will be the 14th workshop in the PODE series which started 2006 at Queen Mary, University of London, under the initiative of Barbara Bogacka and France Mentre, and has been fruitfully continued since then.

As in the past PODE 2020 will be an informal one-day workshop, and it will be free of charge for all participants.

The workshop will be hosted by the Department of Mathematics at the Otto-von-Guericke University Magdeburg.

The aim of this workshop is to bring scientists together who work both on the theory of optimum experimental design for non-linear mixed effects models or its applications in various fields, in particular but not solely, in drug development. Further applications are relevant in item response theory, marketing and agriculture besides others.

For more information about the PODE project and previous PODE workshops please see <http://www.maths.qmul.ac.uk/~bb/PODE/PODE> .

Further details on PODE 2020 and a tool for registration will be available soon at the workshop website <http://www.imst3.ovgu.de/pode20> .

If you would like to present at the workshop we welcome short abstracts to be sent to the conference organizers via the registration tool by March 31.

If you have any questions please do not hesitate to contact us at pode20@ovgu.de .

We would be happy to welcome you in Magdeburg for the PODE 2020 meeting !

Best wishes

Maryna Prus and Rainer Schwabe
