

Reflective Learning Logbook Entry

WEEK _____ DATE _____

Activities undertaken:

Groups of pupils worked with (if relevant, please be aware of Child Protection Act issues as they pertain to student anonymity):

Observations:

What have you seen pupils learning this week/teaching techniques etc?

This section is for you to reflect on your experiences today. Please take some time before next week to complete this.

How do you feel about the session?

Positive outcomes

Include comments on: What did you enjoy about the session? What did you see as your contribution? Did the pupils you worked with understand something new? Materials developed? Don't forget to note any evidence for your thoughts.

Challenges faced

Did you have any difficulties? Why do think they arose? How did you deal with them? Don't forget the sources of help (see Section 2.2).

Action

Is there anything you would like to work on/do differently next week? This could be formulated after discussion with the supervising member of staff. It might include: a reminder to yourself to bring in materials or try different approaches with the pupils. Make a note of what happened when you implement your plan.

Note any thoughts you have had about your values, skills, interests and observations of the experience, Mathematics learning and the organisation of the school and teaching in Section 4 of your 'Reflective Learning Logbook'.
