

PUBLICATIONS

Submitted

Großmann, H. & Gilmour, S.G. (2008). Partially orthogonal blocked three-level response surface designs.

Großmann, H. & Schwabe, R. (2007). The relationship between optimal designs for microarray and paired comparison experiments.

Accepted for publication

Graßhoff, U., Großmann, H., Holling, H. & Schwabe, R. (2009). Optimal design for discrete choice experiments. *Journal of Statistical Planning and Inference*.

Großmann, H., Schwabe, R. & Gilmour S.G. (2009). Designs for first-order interactions in paired comparison experiments with two-level factors. *Journal of Statistical Planning and Inference*.

Book

Großmann, H. (2003). *Designs für Paarvergleiche in der metrischen Conjoint-Analyse*. Wiesbaden: Deutscher Universitäts-Verlag.

Peer reviewed journals

Goos, P. & Großmann, H. (2011). Optimal design of factorial paired comparison experiments in the presence of within-pair order effects. *Food Quality and Preference* **22**, 198-204.

Muller, H., Großmann, H. & Chittka, L. (2010). 'Personality' in bumblebees: individual consistency in responses to novel colours? *Animal Behaviour* **80**, 1065-1074.

Großmann, H., Graßhoff, U. & Schwabe, R. (2009). Approximate and exact optimal designs for paired comparisons of partial profiles when there are two groups of factors. *Journal of Statistical Planning and Inference* **139**, 1171-1179.

Graßhoff, U., Großmann, H., Holling, H. & Schwabe, R. (2007). Design optimality in multi-factor generalized linear models in the presence of an unrestricted quantitative factor. *Journal of Statistical Planning and Inference* **137**, 3882-3893.

Großmann, H., Holling, H., Graßhoff, U. & Schwabe, R. (2006). Optimal designs for asymmetric linear paired comparisons with a profile strength constraint. *Metrika* **64**, 109-119.

Graßhoff, U., Großmann, H., Holling, H. & Schwabe, R. (2004). Optimal designs for main effects in linear paired comparison models. *Journal of Statistical Planning and Inference* **126**, 361-376.

Graßhoff, U., Großmann, H., Holling, H. & Schwabe, R. (2003). Optimal paired comparison designs for first-order interactions. *Statistics* **37**, 373-386.
